

WHAT DO YOU DO IN CASE OF MASSIVE CROWDS OR PANIC?

1 Always look where emergency exits are when you enter an event area or a building. This way you know which way to go when something is wrong.

2 Agree on a meeting place when part of a group, in case you lose track of each other.

3 Keep an eye on reports of the organizer, emergency services and media, for example on an information screen or via social media.

4 Is there an outbreak of panic? Do not run into the human stream.

5 Stay calm and follow any instructions of the organizer or emergency services.

6 Carry children and help people with mobility problems.

7 Do not use your phone and do not use any mobile internet services. Using these mobile services will result in networks being overloaded.

Only use SMS or the Wi-Fi network made available by the organization.
